

7. (Amended) A packaged consumer product according to claim 1, wherein the moulded plastic sheath extends to the full length of the associated bottle or jar.

8. (Amended) A packaged consumer product according to claim 1, wherein the cutaway sections in opposite sides of the sheath extend to the bottom of the sheath.

11. (Amended) A method of manufacture of a packaged consumer product according to claim 1, comprising suitably orientating the bottle/jar and the pre-formed sheath relative to each other and then inserting the bottle/jar into the sheath through the opening at the bottom of the sheath, until the bottle/jar and the sheath are releasably engaged.
